

CORPORATE SAFETY AND HEALTH POLICY

Trinity Industries, Inc. is a multi-industry company that owns a variety of market-leading businesses which provide products and services to the industrial, energy, transportation and construction sectors.

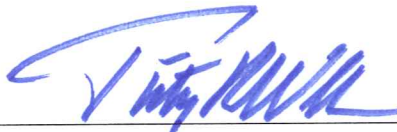

It is the policy of Trinity Industries to take all reasonable steps to eliminate or reduce exposure of employees to accidental injury or conditions, which may adversely affect their safety or health.

Accordingly, it is also a guiding principle of Trinity Industries to manufacture high quality products in a manner that does not violate applicable laws and regulations by actively engaging our employees, our customers and the communities in which we operate, to continuously improve our procedures, processes and management systems to minimize the effect on employee safety and health.

The ideals of production and safety are inseparable. Management does accept the responsibility for the safety and well being of all employees. This responsibility is met by continuously promoting safe work practices among employees and maintaining property and equipment in safe operating conditions.

No job can be successfully completed without following safety rules. All employees must continuously strive to build a personal value for safety within our culture.

Trinity Industries is committed to continually improving our safety performance, with a goal of zero preventable injuries. It is my belief that employee participation in our effort is essential for producing a positive safety culture.

Timothy R. Wallace
Chairman, Chief Executive Officer, and President
