

# MOBILE REPAIR

## MOBILE REPAIR FACILITIES

When the need for repairs arises, it's rarely at a convenient time or place. To get your railcars moving again as quickly as possible, our Mobile Repair facilities, which include customer on-sites, fast-track operations, and a fleet of Mobile Repair Units (MRUs), offer regional coverage that can meet you where you are.

We provide support promptly to help reduce your freight costs and out of service time. Our MRUs are equipped with the tools our maintenance technicians need to perform a wide variety of repair tasks in the field.

By partnering with *TrinityRail's*® Parts & Components division to secure critical components, we're accelerating mobile and on-site expansion and collaborating with strategic partners to extend our reach and elevate our capabilities. All with the goal of keeping your assets utilized with a focus on returning your railcar to service quickly.
